

Press Release – May 2008

Finance Media - Launches Turquoise Trading Platform/Cinnober TRADExpress - FM Data Feed Handler

London - Finance Media a UK based provider of financial market applications and digital data services, today announced the release of their new Turquoise Trading Platform/Cinnober TRADExpress FM Data Feed Handler.

Utilising Finance Media's proprietary server technology the feed handler has been developed to provide connectivity to Turquoise the new European equity trading venue to deliver streaming real-time market data into the Turquoise Website www.tradeturquoise.com.

The Turquoise Trading Platform/Cinnober TRADExpress FM Data Feed Handler offers high performance data management and sub-millisecond data feed delivery and is capable of processing in excess of a billion transactions a day without unnecessary buffering or data loss.

“Our new feed handler will deliver the highest quality market data into the Turquoise website supporting a suite of user tools including dynamically updating level 2 price banded order books and streaming price pages that will very much stand out from the crowd” said RP head of development at Finance Media.

‘As Turquoise website developers and providers, our new feed handler marks our commitment to continuing delivering the best of breed website solutions to our clients and their users and we look forward with some excitement to launching phase II of the Turquoise website project with our streaming market data solutions in October” added GRC - Business Development Director Finance Media.
